

Now comes, Mark Heller, President of Metro North Communications, Inc. of Denmark, Wisconsin with Comments in Support of the Creation of C4 Class of FM broadcast facilities.

As Heller has been a strong proponent, from the very conception of this additional Class of stations, it becomes important to allow for a power increase, in the areas where it can be used.

As mentioned originally, in its first filing, the C4 power increase would especially help minority broadcasters in the Southern United States, and those who are located as 'rimshot' facilities, outside of a standard market.

Metro North Communications, has been a licensee of a small Class A FM station, and is presently negotiating on possibly purchasing another facility, and firmly believes this would benefit our industry.

Small market broadcasters, local owners and minority operators would benefit, and honestly, need this type of relief if it becomes available.

It is respectfully requested, that the Commission seriously consider implementing the proposal as brought forward under MB 18-184 without delay.

Sincerely,

A handwritten signature in cursive script, appearing to read "Mark Heller".

Mark Heller, President
Metro North Communications, Incorporated
